SERVICE BULLETIN

TITLE: OXYGEN – HARNESS ASSEMBLY - INSPECTION FOR POTENTIAL DEFECTIVE COMPONENT

1. PLANNING INFORMATION

A. Effectivity

(1) Concerned equipment

This Service Bulletin applies to the inflatable harness PNR MXH Series manufactured between 50th week of 2008 year (0850S) and 31th week of 2010 year (1031S) for the PNR and batches listed in Appendix I.

These inflatable harness assemblies have been used for the manufacturing of new masks (See Appendix II), and have been sold as spare parts from 15-dec-2008 to 31-dec-2010, for the maintenance of masks already in service.

Inflatable harness PNR MXH Series manufactured before 33^d week of 2008 year (0833S) are not marked with any batch number and are not concerned.

Inflatable harness PNR MXH Series manufactured between 33^d week of 2008 year (0833S) and 49th week of 2008 year (0849S) are marked with a batch number and are not concerned.

(2) In the field

Full Face Quick Donning Mask Regulator (MF10 Series, MF20 Series), Crew Oxygen Mask Regulator (MA10 Series, MC10 Series, MC20 Series, MRA Series) and Oxygen Mask Regulator / With Detachable goggles (MLD20 Series) equipped with potentially defective inflatable harness.

(3) Spare parts

Defective inflatable harness from stock.

(4) Not Concerned equipment

This Service Bulletin does not apply to the following Oxygen Mask regulators

B. Concurrent Requirements

Affected customers should notify their usual Zodiac Services contacts in regards of their location

(ZS Europe, ZS UK, ZS Middle East, ZS Asia and ZS Americas).

Customers to provide the list of PNR and SER affected and place the corresponding orders for replacement.

Removed harnesses must be sent in one batch at the end of the retrofit to the ZS work shop from which your area corresponds to.

C. Reason

This Service Bulletin is issued :

- To inform the operators of the potential risk of rupture on the inflatable harness.
- To provide instructions for inspection and preventive replacement if necessary of potentially defective inflatable harness.

D. Description

Based on our internal review and customer feedback, INTERTECHNIQUE has identified the potentially defective batches of silicon tubes.

Inflatable harnesses assembled with defective silicon tubes have demonstrated an unusually high premature rupture rate.

E. Compliance

Incorporation of this Service Bulletin is mandatory (refer to EASA Airworthiness Directive AD No.: 2011-0090) within 24 months of AD effectivity date.

F. Approval

This document was established in conformity with the INTERTECHNIQUE "Alternative Procedures to Design Organisation Approval" ref. PGQ-5030 approved by the EASA. Technical data were approved by INTERTECHNIQUE in conformity with § 21A.611 of PART 21.

G. Manpower

- (1) 1 technician
- (2) Check only : 5 minutes.
- (3) Complete Operation : 15 minutes.

H. Weight and Balance

* Refer to § 3.D

D. Material necessary for each spare

Not applicable

E. Re-identified Parts

With indelible ink or an electric pen, write visibly the SB accomplishment by adding of letter "I" (Inspected) on the bushing of inflatable harness (See Figure 2).

The marking shall be visible once the harness has been re-installed on the mask.

F. Tooling – Price and Availability

Not applicable

3. ACCOMPLISHMENT INSTRUCTIONS

A. From the stock :

(1) Inspect the batch number (See Figure 3) of the inflatable harness:

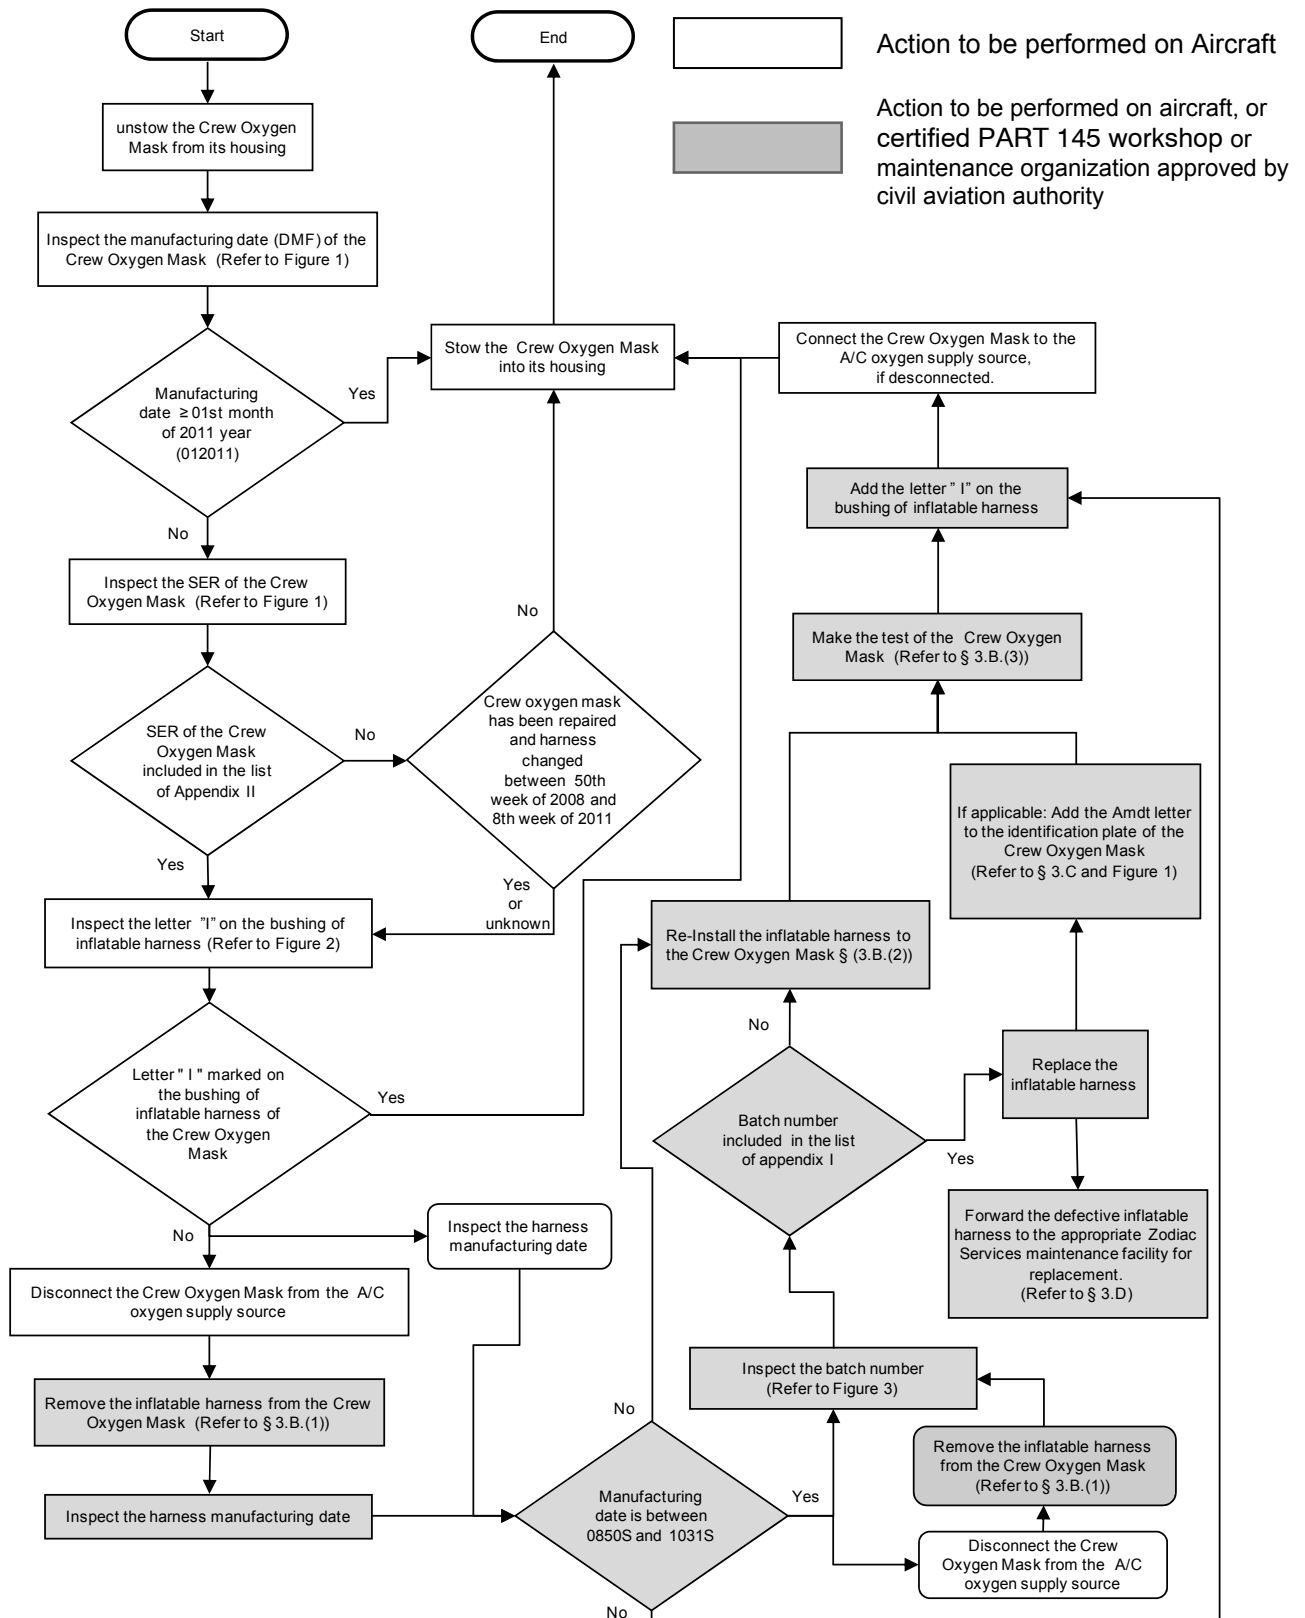

- If the batch number is found in the list of Appendix I, forward the defective inflatable harness to the appropriate Zodiac Services maintenance facility for replacement of the inflatable harness.

B. Inflatable harness mounted on the Crew Oxygen Mask Regulator : (Including in aircraft)

WARNING : STRICTLY OBEY THE PROCEDURES WHEN YOU DO WORK ON OXYGEN SYSTEM. DO NOT USE OIL, GREASE OR OTHER LUBRICANTS MADE FROM PETROL IN THE AREA OF OXYGEN EQUIPMENT. YOU CAN CAUSE A FIRE OR EXPLOSION.

CAUTION : APPLY THIS SB ON CLEAN SURFACE AND WITH CLEAN HANDS.

Prior to using the flow chart to start the on-aircraft action(s), the operator, if he has the possibility, can determine, (e.g. aircraft maintenance logs check) whether the inflatable harness has been replaced, during a maintenance operation, on an oxygen mask regulator installed on the aircraft.

(1) Removal of the inflatable harness from the Crew Oxygen Mask Regulator:

(a) Applicable to MA10, MC10, MC20, MF10, MF20 and MLC/MLD20 Series

- 1 Remove the screw from the inflatable harness with magnetic-screwdriver slotted (3x_ _).
- 2 Lift the locking tab of the coupling block which is in front of the regulator by 1 to 2 mm (0.04 to 0.08 in).
- 3 Hold the locking tab up and move the coupling block apart from the regulator.

NOTE: Be careful not to remove the seal PNR 437276.

(b) Applicable to MRA Series

WARNING: THE REMOVAL OPERATION MUST BE PERFORMED IN CERTIFIED PART 145 WORKSHOP OR MAINTENANCE ORGANIZATION APPROVED BY CIVIL AVIATION AUTHORITY.

- 1 Remove the mask (Refer to CMM 35-17-10 Subtask 35-17-10-020-001-A01)
- 2 Remove the harness (Refer to CMM 35-17-10 Subtask 35-17-10-020-002-A01)

(2) Installation of the inflatable harness to the Crew Oxygen Mask Regulator:

(a) Applicable to MA10, MC10, MC20, MF10, MF20 and MLC/MLD20 Series

WARNING: MAKE SURE THAT THE SEAL PNR 437276 IS CORRECTLY INSTALLED IN ITS HOUSING.

- 1 Install the harness on the regulator body and attach it with the screw.
- 2 Torque the harness attachment screw 0,20 N.m \pm 0,02 (1.77 lb.in \pm 0.17).

(b) Applicable to MRA Series

WARNING: THE REMOVAL OPERATION MUST BE PERFORMED IN CERTIFIED PART 145 WORKSHOP OR MAINTENANCE ORGANIZATION APPROVED BY CIVIL AVIATION AUTHORITY.

- 1 Install the harness (Refer to CMM 35-17-10 Subtask 35-17-10-420-006-A01)
- 2 Install the mask (Refer to CMM 35-17-10 Subtask 35-17-10-420-007-A01)

- (3) Test of the Oxygen Crew Mask
 - (a) Test of the time to inflate the inflatable harness:
 - 1 Connect the Crew Oxygen Mask Regulator to the oxygen supply source.
 - 2 Make the oxygen supply pressure stable:
On aircraft: Use the O2 pressure system.
In workshop: Refer to the relevant CMM.
 - 3 Push the harness inflation plate.
 - a Make sure that the harness is fully inflated in one second maximum.
 - b Make sure that there is no noticeable leakage.
 - (b) Apply a drop of leak test solution (SHERLOCK Type 1 or equivalent as per MIL-PRF25567) to the inflatable harness.
 - 1 Make sure that there is no leak between the regulator and the inflatable harness.
 - (c) Make the test of mask regulator inner leakage (Applicable to MRA005).
 - 1 (Refer to CMM 35-17-10 Subtask 35-17-10-790-001-A01).

C. Re-identification

After modification of inflatable harness MXH15-2, MXH16, MXH30, MXH33, MXH30G or MXH74G by inflatable harness MXH15-22, MXH16-20, MXH30-20, MXH30-20G or MXH74-20G:

- The Crew Oxygen Mask Regulators MC10 Series are identified with the amendment letter **S**,
 - The Full Face Quick Donning Mask Regulators MF10 Series are identified with the amendment letter **T**,
 - The Full Face Quick Donning Mask Regulators MF20 Series (Except MF20-107) are identified with the amendment letter **M**,
 - The Crew Oxygen Mask Regulators MA10 SERIES are identified with the amendment letter **Q**,
 - The Full Face Quick Donning Mask Regulators MF20-107 is identified by the new **PNR MF20-108**,
- (1) With indelible ink, write the relevant amendment letter or the new PNR on the identification label.

D. Declaration of Modification

The form attached in appendix IV is to be filled by the customer and attach to the PO.

Possible format of the manufacturing date:
102010 = 10th Month of 2010
1010 = 10th Month of 2010
