

PILATUS AIRCRAFT LTD. CH-6371 STANS, SWITZERLAND

# SERVICE LETTER

**SUBJECT: P&WC SERVICE BULLETIN PT6A-72-14271, COMMERCIAL SUPPORT PROGRAM NO. A 98016 AND SERVICE INFORMATION LETTER PT6A-058**

To all Customers:

Date: Sep 22/98

This Service Letter is issued to draw the attention of all customers to the following vendor information:

**P&WC Service Bulletin PT6A-72-14271, Turboprop Engine - Propeller Governor - Test/Inspection Of.**

**P&WC Commercial Support Program No. A98016, Special Program Allowance.**

**P&WC Service Information Letter No: PT6-058, One-time Propeller Governor Inspection on PT6A-67B Engines.**

Pilatus recommends all customers with PT6-67B engines, that have up to 100 operating hours, to embody the P&WC Service Bulletin PT6A-72-14271.

A propeller governor malfunction, related to the pump idler gear, resulted in a gradual loss of propeller governor pump performance and the inability to obtain the full reverse rpm. The P&WC Service Bulletin gives a one-time test/inspection to determine if existing propeller governors in the field exhibit this loss of pump efficiency.

**NOTE:** Propeller governor assemblies that have been reidentified "RE92" have been inspected and no further action is necessary.

The P&WC Commercial Support Program Notification No. A98016 gives assistance in the accomplishment of the Service Bulletin.
