

Team Leader Airborne Software

Fly with us into the future and become part of the team at one of the most innovative aircraft manufacturers in the world.

ENGINEERING & TRAINING SYSTEME

Your place of work: Stans, Schweiz

What you do:

- Leading a team of approx. 20 internal and external staff to deliver and maintain software products per defined requirements
- Development and training of team members as well as strategic planning and budgeting for the team
- Management of projects ensuring delivery within agreed timelines and budgets
- Procurement of services and equipment in support of the projects
- Administration and maintenance of team-specific IT systems/equipment/facilities
- Publication of software development processes incl. the responsibility for Supplemental Documents and Engineering Standards

What you bring:

- University degree in Software Engineering, Computer Science or equivalent
- At least 10 years of experience in the field of embedded software development, preferably in a safety-critical environment
- Proven experience in leadership of large multi-cultural and multi-disciplinary teams
- Knowledge of software engineering processes, structured architecture and design methodologies
- Ability to quickly adapt to changing requirements or situations and to balance conflicting priorities
- Strategic focus on team development and continuous optimisation of products and processes

What we offer

- Financial participation in the company's success
- Flexible working hours
- Promotion of job-related trainings
- Good social benefits
- Referral fees for successful employee placement
- Discounted meals in our staff restaurant and employee discounts
