

Junior Product Manager

Fly with us into the future and become part of the team at one of the most innovative aircraft manufacturers in the world.

ENGINEERING & TRAINING SYSTEME

TRAINING SYSTEMS

Your place of work: Stans, Schweiz

What you do:

- Collect stakeholders inputs to translate them into functional and technical requirements for the evaluation of feasibility and implementation efforts on training systems products (aircraft, simulators, computer based training, etc.)
- Compile technical report, decision papers and requirements to support product management decision making and solutions implementation
- Liaise with customer support, engineering and procurement to directly trigger and manage the necessary activities related to obsolescence reports, resolution studies and implementation
- Support the definition of the product roadmap and its implementation by prioritizing product features integration in collaboration with the engineering departments
- Preparation of requirements document for R&D activities performed by internal and external stakeholders
- Preparation of investment requests (technical and financial documentation)

What you bring:

- Experience in product management of aviation products or in aircraft systems design
- University master degree in aeronautical, mechanical or electrical engineering (electronics); an additional university degree in economic studies, e.g. business administration or economics, is considered an advantage
- English minimum level C (additional languages such as German constitute an advantage)
- Self-motivated, dedicated and focused on continuous improvement and efficiency

What we offer

- Financial participation in the company's success
- Flexible working hours
- Promotion of job-related trainings
- Good social benefits
- Referral fees for successful employee placement

- Discounted meals in our staff restaurant and employee discounts
