

Senior Product Manager

Fly with us into the future and become part of the team at one of the most innovative aircraft manufacturers in the world.

ENGINEERING & TRAINING SYSTEMS

TRAINING SYSTEMS

Your place of work: Stans, Switzerland

What you do:

- Collect stakeholders inputs to translate them into functional and technical requirements for the evaluation of feasibility and implementation efforts on training systems products (aircraft, simulators, computer based training, etc.)
- Perform market assessment, competitors analysis as well as new and emergent technologies analysis
- Define the product roadmap and manage its implementation by prioritizing product features integration in collaboration with the engineering departments
- Coordination of bid activities defining the product baseline content (e.g. Bill of Material), product modifications, production costs and schedule as per the stakeholder requirements
- Preparation of requirements document for R&D activities performed by internal and external stakeholders
- Preparation of investment requests (technical and financial documentation)

What you bring:

- Experience in product management of aviation products or in aircraft systems design
- University master degree in aeronautical, mechanical or electrical engineering (electronics); an additional university degree in economic studies, e.g. business administration or economics, is considered an advantage
- English minimum level C (additional languages such as German constitute an advantage)

What we offer

- Financial participation in the company's success
- Flexible working hours
- Promotion of job-related trainings
- Good social benefits
- Referral fees for successful employee placement
- Discounted meals in our staff restaurant and employee discounts
