

GBTS Planning Engineer

Fly with us into the future and become part of the team at one of the most innovative aircraft manufacturers in the world.

ENGINEERING & TRAINING SYSTEMS

TRAINING SYSTEMS

Your place of work: Stans, Switzerland

What you do:

- Create and manage time, resources and costs plans and schedules for the design and implementation of Pilatus training systems products, ensuring projects are completed on time and within budget
- Collaborate directly with the engineering teams (system, hardware and software) to decide on the most appropriate engineering tasks and sequence of activities for each project stage
- Collaborate with production engineering to ensure correct planning and delivery of fabricate components (e.g. parts and components)
- Define the necessary KPIs to analyse projects performances, address any arising deficiency or risk and write the required project reports
- Support estimation activities for timelines and costs of new projects
- Support reviews of the department engineering practices

What you bring:

- Degree in computer or electronic engineering. University master degree represent an advantage
- At least three years of working experience in engineering planning and management of activities for the design and development of products for the aeronautical or automotive industry
- Sound knowledge of system engineering processes and standards (e.g. IEEE 15288 or equivalent)
- Proficiency in project management practices and procedures as well as project management tools as Microsoft Project, BigPicture or similar
- High emotional intelligence to manage working group dynamics
- Ability to work to tight deadlines and under pressure on parallel tasks

What we offer

- Financial participation in the company's success
- Flexible working hours

- Promotion of job-related trainings
- Good social benefits
- Referral fees for successful employee placement
- Discounted meals in our staff restaurant and employee discounts
